

Design future of your business with SAP® Solutions

Before: Challenges

- ❑ No track of daily actives example, financial, projects, inventory etc.
- ❑ Haphazard project planning and no systematic tracking of project status
- ❑ No inventory management for material used for building purposes
- ❑ Dearth of software available in the market where all departments of the organization could be integrated in a single platform.

Why SAP and R.S. Infonet?

- ❑ Organized processes followed with integration of SAP Business One
- ❑ Project status tracking enabled with SAP B1. Tracking available in both desktop and mobile applications
- ❑ SAP Business One proven to be the most efficient and affordable ERP solution in the market for SMEs
- ❑ R.S. Infonet has proven to be the best development, implementation and support partner. We strongly recommend their services.

After: Value-Driven Results

- ❑ Work flow, assignment tracking, financial tracking and monitoring activities highly improved throughout the organization.
- ❑ Decisions can be made at the click of a button, saving time and increasing efficiency.
- ❑ Use of latest of technology gives us an edge over our competitors
